**Re: Final Decision for Two New Emergency Diesel Generators**

Dear Ms. Erkeneff:

The Antelope Valley Air Quality Management District (District), in accordance with Rule 1304 (C)(4), has completed the final decision/determination on the proposed installation of two emergency diesel generators at Lockheed Martin (LM) Aeronautics Corporation-Palmdale. LM will offset the emission increase associated with the installation of the new generators using emission reduction credit (ERC) certificate number AV0014. The resulting balance after the transfer will be applied to a new certificate and issued to LM. The proposed action also constituted a minor modification to LM Federal Operating Permit (FOP #97001754). The District will proceed with issuing the appropriate Authorities-To-Construct and the revised FOP.

Enclosed please find the final decision/determination, prepared pursuant to District Regulation XIII and XXX.

If you have any questions regarding this action or the enclosure, please contact Chris Anderson at (760) 245-1661, extension 1846.

Sincerely,

A handwritten signature in black ink, appearing to read "Chris Collins".

**Christopher A. Collins**  
Supervising Air Quality Engineer
